

Student Internship

for the future Salesforce developers

Everyone has heard of
Salesforce, am I right?

What exactly is Salesforce?

If you want to automate almost any business process
Salesforce is the way to go.

You can integrate it with applications
you already use, like ERP and many others.

Salesforce enables business automation.
It is not just a classic CRM.

You can fully automate your company's sales, marketing,
production and administrative processes.

It is the world's number 1 CRM system
used by leading corporations and brands.

Have you heard of Intermino?

Founded in 2017 in Serbia with the goal of becoming a premium Salesforce Consulting Partner.

We are the official Salesforce Consulting Partner.

Our clients are some of the most famous IT companies in the world.

What promise have we made to our clients?

Hire top 5%
Salesforce
professionals.

Why should you attend a student internship at Intermino?

You will learn a lot about Salesforce.

You will gain great experience working on the platform.

You will prepare for your first Salesforce certification.

You will have the possibility of getting your first job.

What are the requirements to participate in the internship?

Basic requirements for communication include:

Functional email address,
A computer connected to the Internet,
Microphone, speakers, and webcam,
Quiet place to work (office, bedroom,
workroom, park, car...)

A high level of motivation and hard work is required,
as we maintain strict criteria for internship results.

Intermediate level of English language.

Approximately 8 hours a day dedicated to
practice for two months. (Monday-Friday).

Internship plan

First month: Theoretical knowledge of Salesforce. Why?

Because having a strong theoretical foundation is crucial for effective application development.
Theoretical knowledge enhances your preparation for the Salesforce certification exam.
Participating in our seminars and workshops will further strengthen your theoretical understanding.

Second month: Practical knowledge. Develop a full-stack application in Salesforce.

Design and create the data model and database.
Choose between using code and point & click.
Develop a UX/UI design concept and initiate the application build.
Prepare the application for quality control and launch.

What is your internship day going to look like?

First month

Morning meetings with mentors,
Studying the material sent to you for that day,
Occasional seminars,
Tasks resolving,
Sending the daily report at the end of the day.

Second month:

Morning meetings,
Application development,
Individual meetings with mentors about app development,
Sending the daily report at the end of the day.

Thank You!
